DOMAIN INTELLIGENCE AND EVIDENCE

Each domain below is drawn from the latest saved intelligence output and keeps findings, affected entities, evidence, and actions together.

IDENTITY PROTECTION

Azure Identity Protection evidence | Latest saved intelligence output

IDENTITY HEALTH

72%

Azure posture score

IDENTITY RISK

28%

moderate risk level

MFA COVERAGE

79%

12 identities outstanding

HIGH-RISK USERS

1

review required

IDENTITY POSTURE

Most identities have healthy access controls, with MFA enrollment and privileged-account remediation still required.

BUSINESS IMPACT

A compromised privileged identity could allow broad access to the tenant and interrupt business operations before the activity is detected.

IDENTITY EVIDENCE SNAPSHOT

USERS WITHOUT MFA

12 of 58 identities

HIGH-RISK USERS

1 requires investigation

PRIVILEGED ACCOUNTS

6 1 without MFA

INACTIVE IDENTITIES

36 no sign-in for 30+ days

PRIORITY FINDINGS

● Break-glass account is missing MFA

FINDING

A privileged emergency access account is not protected by multi-factor authentication.

SEVERITY

High

EVIDENCE

Administrators without MFA

No individual identity records were returned with this finding.

RECOMMENDATIONS

- Require MFA for the break-glass account and validate the recovery process

● Privileged users have multiple roles and MFA gaps

FINDING

Five privileged users have multiple privileged roles, increasing risk exposure. One privileged user lacks MFA.

SEVERITY

High

IMPACT

Compromise of these accounts could lead to broad access and control.

WHY IT MATTERS

Privileged roles can change tenant-wide settings and expose sensitive business data.

EVIDENCE

Users without MFA

- Break-glass account
admin@example.com
MFA not enabled | Risk HIGH | Global Administrator

RECOMMENDATIONS

- Require MFA for every privileged account
- review each privileged role assignment
- remove roles that are not required

EVIDENCE CATALOG

All users | 58 record(s) | source: totalUsers

- User: Break-glass account | Roles: Global Administrator | MFA: false | Risk: HIGH | Last sign-in: Unknown, Unknown, inactive

Users without MFA | 12 record(s) | source: mfaMissing

- User: Break-glass account | Roles: Global Administrator | MFA: false | Risk: HIGH

Privileged users | 6 record(s) | source: privilegedUsers

No individual records were stored for this evidence category.

Administrators without MFA | 1 record(s) | source: adminsWithoutMfa

No individual records were stored for this evidence category.

High-risk users | 1 record(s) | source: highRiskUsers

No individual records were stored for this evidence category.

Inactive users | 36 record(s) | source: inactiveUsers

No individual records were stored for this evidence category.

RECOMMENDED ACTIONS

- Require MFA for the break-glass account and validate the recovery process
- Require MFA for every privileged account
- review each privileged role assignment
- remove roles that are not required
