Current identity health score

RISK SCORE

28%

moderate risk level

DOMAIN SUMMARY

Most identities have healthy access controls, with MFA enrollment and privileged-account remediation still required.

BUSINESS IMPACT

A compromised privileged identity could allow broad access to the tenant and interrupt business operations before the activity is detected.

PRIORITY FINDINGS

● Break-glass account is missing MFA

FINDING

A privileged emergency access account is not protected by multi-factor authentication.

SEVERITY

High

IMPACT

A privileged emergency access account is not protected by multi-factor authentication.

WHY IT MATTERS

A privileged emergency access account is not protected by multi-factor authentication.

EVIDENCE

0 StackCTRL evidence row(s) support this finding.

● Break-glass account

admin@example.com
MFA not enabled | Risk HIGH | Global Administrator

11 additional affected identity records are available in the Identity dashboard.

RECOMMENDATIONS

- Require MFA for the break-glass account and validate the recovery process

● Privileged users have multiple roles and MFA gaps

FINDING

Five privileged users have multiple privileged roles, increasing risk exposure. One privileged user lacks MFA.

SEVERITY

High

IMPACT

Compromise of these accounts could lead to broad access and control.

WHY IT MATTERS

Privileged roles can change tenant-wide settings and expose sensitive business data.

EVIDENCE

0 StackCTRL evidence row(s) support this finding.

No individual identity records were returned with this finding.

6 additional affected identity records are available in the Identity dashboard.

RECOMMENDATIONS

- Require MFA for every privileged account
- review each privileged role assignment
- remove roles that are not required
